

Level The Playing Field With The Kiser Edge

Kiser Edge AWARDED

To The Highest Composite Score At The 2010 NRHA Derby Of The Level 3 Intermediate Open

Scores consist of Go Round 1 & 2 Composite Score

Kiser Water Wagon

Building and maintaining the proper moisture level in arena footing is critical to proper footing maintenance. Proper moisture eliminates excessive dust and gives the arena footing the strength and cushion required to enable performance horses to train and compete at their peak.

Arena Rascal Pro™

The Arena Rascal Pro™ is the best low behind style arena drag on the market and offers an incredible array of advantages the competition cannot match. Designed for use behind ATVs, UTVs and compact tractors, this tool offers a radical change in how arena footing is maintained.

TR3™ Rake

The TR3™ Rake has the precision control required for horse arenas AND the aggressiveness required to grade gravel driveways, create paddocks, prep pasture seedbed, prep for food plots, complete light land clearing projects and so much more.

Kiser DragMaster™

The Kiser DragMaster™ is the most respected arena drag in the world. Used and recommended by the NRHA, AQHA, NCHA, NRCOA, and many of the industry's top horsemen. The combination of the proper moisture content, right depth, right consistency, levelness and lack of hard/soft spots is critical. With the features of the Kiser DragMaster™, you will be able to add water, change your footing depth "on-the-fly", level out your arena and eliminate all hard and soft spots—all from the seat of your tractor!
